## Note

### Notes

Gli impianti sono realizzati parzialmente in metallo e possono quindi reagire ai metal detector e determinare risultati indesiderati durante esami diagnostici per immagini (ad es. RMN).  
Implants are partly made of metal and can cause metal detectors to react and can lead to undesired results in imaging procedures (e.g. MRI examinations).

Portate quindi sempre con voi il passaporto impianto, soprattutto in caso di volo aereo, in modo da poterlo presentare, se necessario, durante i controlli di sicurezza.

Please always carry your implant passport with you, especially when traveling by air, so that you can identify yourself at security checks if necessary.

In caso di eventuali complicazioni, rivolgetevi all'ospedale in cui è stato eseguito l'impianto.  
In case of any complications, please contact the clinic where you were operated.

**Conservare con cura il  
passaporto impianto**

*Please keep the implant ID Card  
carefully*
