

SHARK CAGE®

ANTERIOR
CERVICAL
INTERBODY
FUSION

SHARK CAGE®

FEATURES

SHARK CAGE®, the essential part of bricon cervical spine portfolio, used for anterior cervical interbody fusion. It covers extensive range of specification, including two shapes of footprints, four different combinations of width and depth, and eight heights, which could be powerful tool for surgeons to address the challenges posed by everyday surgery.

SHARK CAGE® is made of biocompatible PEEK material, can be used as stand-alone cage, or to be physically combined with the shark plate to form much stronger construct, or could be used with SHARK CP® or SHARK CP PRO®, two generations of ACP plate of Bricon.

FEATURES:

-  Lordotic and Anatomic shape
-  Eight different heights
-  Teeth on the implant surface provide initial stability
-  Easy-of-use instrumentation
-  Three-point Radiopaque markers for visualisation during imaging

SHARK CAGE®

IMPLANTS

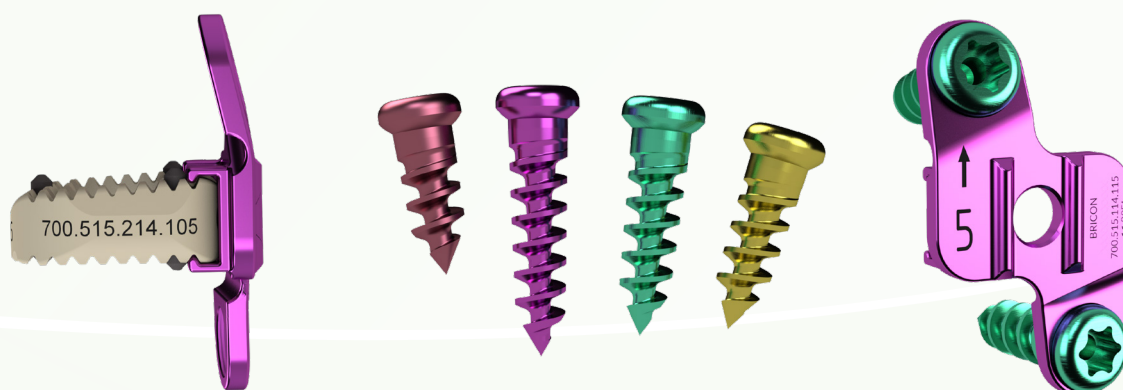

ARTICLE NUMBER	ARTICLE DESCRIPTION	SIZE (WIDTH X LENGTH)	HEIGHT
700.515.214.1XX	SHARK CAGE lordotic shape	13 x 14	5-12
700.515.217.1XX	SHARK CAGE lordotic shape	13 x 17	5-12
700.517.217.1XX	SHARK CAGE lordotic shape	16 x 17	5-12
700.517.219.1XX	SHARK CAGE lordotic shape	16 x 19	5-12
700.522.214.1XX	SHARK CAGE anatomic shape	13 x 14	5-12
700.522.217.1XX	SHARK CAGE anatomic shape	13 x 17	5-12
700.523.217.1XX	SHARK CAGE anatomic shape	16 x 17	5-12
700.523.219.1XX	SHARK CAGE anatomic shape	16 x 19	5-12

Lordotic Shape

Anatomic Shape

ARTICLE NUMBER	ARTICLE DESCRIPTION	Ø	LENGTH (XX)	HEIGHT (XX)
700.515.114.114	SHARK CAGE Plate			5-12
700.515.111.412	SHARK CAGE Screw	4	12-18	

SHARK CAGE®

MORE INFORMATION

INSTRUMENTS

- Simple insertion instrument
- Easy to use
- Self explaining (intuitive)
